SUMMARY

Machine Learning Engineer with hands-on experience in Machine Learning, Generative AI, RAG, and Agentic AI. Skilled in Python, LangGraph, LangChain, Google Gemini, and building practical AI applications with FastAPI, Streamlit, and Docker.

SKILLS

Programming Languages: Python, SQL

GenAI & LLM: Generative AI, Agentic AI, LLMs, LangGraph, LangChain, Google Gemini, Google GenAI SDK, Prompt Engineering, RAG, Conversational AI

RAG & Vector Databases: ChromaDB, FAISS, Vector Embeddings, Semantic Search, Similarity Search, Document Processing, Text Splitting

Agentic AI & AI Tools: Agentic Workflows, Research Planning, Tavily, Web Search Integration, Source Processing, Information Synthesis

ML/NLP: Scikit-learn, NLP, Text Preprocessing, Classification, Regression, Feature Engineering, Model Evaluation, SMOTE

Deep Learning: Artificial Neural Networks (ANN), Convolutional Neural Network (CNN)

Data Analysis & Visualization: Exploratory Data Analysis, Statistical Analysis, Data Cleaning, Matplotlib, Seaborn

Libraries & Frameworks: Pandas, NumPy, TensorFlow, Keras

Frameworks & Deployment: FastAPI, Streamlit, Docker, Git, GitHub, AWS EC2

WORK EXPERIENCE

Machine Learning Intern Cognifyz IT Solutions Pvt. Ltd. — Remote

Jun 2026 – Jul 2026

- Developed machine learning solutions for restaurant analytics by completing projects involving restaurant rating prediction, recommendation systems, and cuisine classification.
- Performed data preprocessing, handled missing values, encoded categorical features, and prepared datasets for machine learning model development.
- Built and evaluated machine learning models for regression, classification, and content-based recommendation tasks using Python and Scikit-learn.

PROJECTS

AI Research Assistant (Python, LangGraph, LangChain, LLMs, Tavily, Streamlit, Docker) [Link](#)

Sep 2026

- Built an agentic AI research assistant that transforms research questions into structured research workflows using LangGraph.
- Developed a research planning workflow to generate focused search queries and retrieve relevant information from the web using Tavily.
- Integrated retrieved context with LLM generation and structured the application for FastAPI API deployment and Docker containerization.

RAG Document Assistant (Python, LangChain, Google Gemini, ChromaDB, RAG, FastAPI, Docker) [Link](#)

Aug 2026

- Built a RAG application for querying information from uploaded documents using LangChain and Google Gemini.
- Developed a RAG pipeline covering document loading, text splitting, vector embeddings, ChromaDB storage, and similarity-based retrieval.
- Integrated retrieved context with LLM generation and structured the application for FastAPI API deployment and Docker containerization.

AI Persona Assistant (Python, Google Gemini, Google GenAI SDK, Streamlit) [Link](#)

Aug 2026

- Built a conversational AI application using Google Gemini with configurable Coding Tutor, Friendly Assistant, and Sarcastic Buddy personas.
- Implemented custom conversation memory to maintain chat history and provide context-aware responses.
- Developed a Streamlit chat interface with persona selection, persona switching, conversation management, and streaming LLM responses.

CERTIFICATIONS

- Machine Learning Mastery
- Data Science & Analytics with Artificial Intelligence
- Data Analysis with Python

EDUCATION

Bachelor of Science in Information Technology

University of Mumbai, Mumbai, India

Jun 2022 – Apr 2025

CGPA: 8.22 / 10
